### DOOR SPECIFICATIONS

#### OVERVIEW

Series 9600 Aluminum Sliding Doors are independently tested for structural and thermal performance and manufactured by Superior Windows & Doors.

#### MATERIAL & CONSTRUCTION

Outside frames, door stiles and rails are constructed from aluminum extrusions of 6063 – T5 alloy and tempered with a minimum thickness of .062. Unique sill design directs water run-off to the outside. Panels have interlocking corners. Door panels slide on the interior. Frame corners are to be caulked by the installer prior to installation in order to prevent leaks.

#### FINISH

Standard finishes are white or bronze paint and clear satin anodized. Upgrade to Bronze Anodized or one of our Designer Colors.

### WARRANTY

#### FULL LIFETIME WARRANTY\*

In the unlikely event that your Superior aluminum windows and doors should require maintenance, our Full Lifetime Warranty covers the labor necessary to repair your windows and doors, including the aluminum and glass seal, for as long as you own and occupy your home. The warranty also includes glass breakage for windows. For complete warranty details, see the full warranty online at superior-windows.com.

\*Superior warranty may be limited outside the contiguous U.S.

Kids Can't Fly Screens are not designed to restrain a child from falling through an open window. Please take proper precautions.

#### GLAZING

Dual glazed with  $^7/\!s"$  insulated glass and features the Intercept® warm-edge spacer system. Energy saving Climate Shield^m with Silvercoat³ high performance glazing system featuring Low-E³ glass available as an upgrade.

#### WEATHERSTRIPPING

Twin fin seal weatherstripping is used to form a barrier between panel and frame.

#### HARDWARE

Doors feature tandem adjustable rollers (adjustable from the inside) and a heavy-duty handle with an optional key lock.
